SUMMARY

Software Engineer with 2 years of experience building backend systems, REST APIs, third-party integrations, and database-driven applications using Python, FastAPI, Django, and Frappe. Experienced in designing production APIs, integrating external services, SQL databases, payment systems, and AI-powered document processing.

SKILLS

Languages: Python, JavaScript, C, C++

Backend: FastAPI, Django, Frappe, REST APIs, Asynchronous Processing

Databases: MariaDB, PostgreSQL, SQL

Infrastructure & Tools: Docker, Linux, Git, GitHub

Integrations: Third-party APIs, Payment gateways, Biometric systems, LLM APIs, Cross-system data Synchronization

EXPERIENCE

Python Software Engineer | Sajeelo Infotech | *May 2026 – June 2026 | Freelancing*

- Designed and deployed REST APIs that synchronized business data across multiple systems while ensuring consistency and reliability.
- Developed a Vehicle Management System covering vehicle service tracking, billing, spare-parts management, and related business workflows.

Software Engineer | Raindrop Inc. Pvt. Ltd. | *September 2024 – April 2026 | Full-time*

- Developed a construction ERP with 5+ modules covering procurement, labor, projects, and finance workflows.
- Integrated Fonepay payment gateway APIs, implementing authentication, payment workflows, transaction handling, and synchronization between payment and ERP systems.
- Integrated biometric hardware with the ERP system to automatically synchronize employee attendance records.
- Developed Python and JavaScript customizations across application, database, and integration layers, resolving production issues and improving ERP workflows.

Frappe Developer | AGB Company | *August 2025 – January 2026 | Part-time, Remote*

- Built 5+ Python/JavaScript modules for booking, scheduling, and e-commerce workflows, reducing errors by approximately 40%.
- Built e-commerce module front-end in JavaScript/Frappe, and online ordering workflows.

PROJECTS

SnapLedger - AI Powered Receipt Intelligence API

- Built an AI-powered receipt intelligence API using FastAPI and Google Gemini Vision API
- Designed prompts to extract structured financial data from receipt images into normalized JSON.
- Implemented asynchronous document processing using Redis/arq for scalable AI workflows.
- Developed REST APIs for document upload, processing, and structured data retrieval.GitHub Repository

Budget Buddy - Django Expense Tracker

- Built a Django expense tracker with PostgreSQL, Google OAuth and reporting dashboard. GitHub Repository

Course Recommendation System

- Recommendation engine using TF-IDF vectorization and cosine similarity with Pandas and NumPy
- Processed and analyzed 100+ courses to generate personalized recommendations.

EDUCATION & CERTIFICATIONS

Bachelor of Science in Computer Science and Information Technology | Bhaktapur Multiple Campus | 2025

Aspire Leaders Program | Aspire Institute | Dec 2025
